KHELLIN
External Solution

Composition:
Each 100 ml Khellin external solution contains: Khellin 2 g.

Properties:
Khellin is the purified active extract from the plant Ammi visnaga. It is active in restoring normal skin color in vitiliginous areas in patients with vitiligo.

Khellin is not associated with adverse effects during treatment and has the advantage of excellent local tolerance.

Indications:
Khellin is used in the treatment of vitiligo photochemotherapy in adults and children.

Contraindications:
Hypersensitivity to the drug.

Pregnancy and Lactation:
Khellin is not recommended for use during pregnancy and lactation.

Side effects:
It may cause skin rashes, or itchy skin. In this case stop using this drug right away.

Precautions:
Avoid severe sun exposure.

Dosage and Application:
Apply Khellin external solution as a thin layer on the vitiliginous areas 30 minutes before sun exposure. The treated areas may then be exposed to the morning or afternoon sun for 30-60 minutes. Treatment should be carried out daily.

Packing:
Khellin external solution: A bottle of 100 ml.

Storage:
Keep in well closed original container. Protect from light and heat. Keep out of the reach of children.
